

EMT 3201: PRODUCTION TECHNOLOGY

CAT 2

- A) Describe two types of polymers.
- B) Describe one method of fabrication of crystalline ceramics.
- C) List six general properties of ceramics.
- D) With the aid of a diagram, describe the compression molding process of polymer processing.
- E) Briefly explain the following methods used in forming ceramic parts:
 - i. Extrusion
 - ii. Slip casting
- F. Discuss two types of fiber reinforced plastics
- G. What are major properties of fiber reinforced plastics
